

Architect or Experienced Intern

April 17, 2024

DeForest Architects

www.deforestarchitects.com

DeForest Architects is inventive, thoughtful, collaborative, and in need of an Architect or Experienced Intern in our Seattle and Lake Tahoe studios.

Clients have described our process as “inclusive, hands-on, fun, and addictive.” That hits the mark because it reflects our desire to be innovative not only in *what* we design, but in *how* we listen, learn, and work together. Learn more about our work and unique client process at <https://www.deforestarchitects.com/process>.

We need architectural production, technical, project management, and design skills gained from 3 to 7 years of experience working on challenging projects, including custom residential projects. These skills will be developed further under the supervision of our experienced architectural staff. If you and the firm grow as we expect, there will be prospects for greater responsibilities in the future. Attention to detail and thoughtfulness are a must, and communication and organizational skills should be second nature. Experience in ArchiCAD and Adobe Creative Suite are a plus and a good sense of humor is a prerequisite.

We seek

idea people who are also capable of contributing to projects from start to finish, **collaborators** who share their initiative, inspiration, and enthusiasm, **professionals** who combine wide expertise with a spirit of discovery, and **talented designers** who are devoted to serving clients.

We have a sunny courtyard studio in Ballard in Seattle, WA and another in Lake Tahoe, CA, as well as a slate of exciting projects on the boards.

DeForest Architects brings people, buildings, and ideas together. If the work we do sounds interesting to you, and you have the experience we’ve described, please email your resume and work samples to hire@deforestarchitects.com. We look forward to talking to you.
