JOB DESCRIPTION - DESIGNER

At WMB Architects, we believe that an open, non-competitive, and collaborative work environment leads to innovative design solutions and exceptional client service.

At WMB Architects, you can expect challenging work involving creative problem solving. You will directly participate with Principals and Project Architects on critical project tasks and be exposed to construction through jobsite visits and in construction administration tasks.

We take pride in supporting your professional development, by promoting continuing education, providing AXP mentoring, and reimbursement for passed ARE exams.

At WMB Architects, we offer competitive benefits including healthcare (medical, dental, vision) and 401k profit sharing contributions.

DESIGNER

Role

- Key Support for Project Architect across all phases of design process on a wide range of architectural projects
- Development of design concepts
- Collaboration with design team and studio at large in an effort to improve our process and product.
- Coordination with client representatives, consulting engineers, and designers, jurisdictional authorities, and contractors to realize project goals.
- Actively pursue Architectural license through participation in AXP and by preparing for and taking California Architectural registration exams.

Experience

- Bachelor or Graduate Degree in Architecture
- Demonstrated design, organizational, critical thinking, and verbal, written and graphic communication skills.
- Ability to work both independently and collaboratively.
- Proficiency in Revit, Photoshop and Sketch-up
