

*This event is the only regionally focused codes event in Sacramento!*

2019

# 15<sup>th</sup> Annual

codes conversation

**The idea of the Codes Conversation program is simple: bring together Code Officials with Design Professionals once a year to discuss how we can work together more efficiently in the arena of codes and permits.**

**This year's program will focus on the 2019 building code, specifically what you need to know from the perspective of our regional building officials.**

We've invited code officials from key jurisdictions to offer insights and perspectives on the new code version coming out in a couple of months - this is a great way to get ahead of the curve!

Additionally, this program gives you an opportunity to meet your local officials; share your conundrums, ideas, and suggestions; and collaborate!

If you have specific technical questions for our panel of experts, please send them in advance of the program via e-mail to our moderator, Michael F. Malinowski, FAIA, Applied Architecture, at [mfm@appliedarts.net](mailto:mfm@appliedarts.net)

---
